October 13, 2020

Dear Barnum Staff and Community,

We were notified by the Minnesota Department of Health (MDH) of a lab confirmed case of COVID-19 in a member of the Barnum Public Schools with exposure date(s) of October 6-8.

We have worked with the MDH to identify those who had close contact with the case, and are communicating with them individually. The person with the positive test was identified on Thursday, October 8. The individual who tested positive will be excused from school until it has been determined by the local health department that they are no longer infectious. The risk of exposure for other individuals present in the building on that date is no greater than the risk of contracting the virus in the general community.

If you were not identified to have close contact with the positive case you should still monitor for symptoms of illness, but do not need to stay home unless symptoms develop. If symptoms develop, stay home and consult with your physician to determine if medical evaluation is needed.

We understand that this may create unease in our community. We have taken action to clean and sanitize the rooms and facility and are working closely with MDH to monitor the situation. We are asking all members of our community to minimize the spread of illness by taking the following actions:

- Protect yourself and others by wearing a face covering when it is hard to stay 6 feet away from people; washing your hands often with soap and water; covering your cough and sneeze; and avoiding touching your face with unwashed hands.
- If you are sick, stay home from child care and other activities.
- Be prepared in case you get sick and need to stay home.
- Frequently clean all commonly touched surfaces (e.g., telephones, doorknobs, countertops, etc.).

If symptoms develop, stay home and consult with your physician to determine if medical evaluation is needed. If you are experiencing symptoms of COVID-19, MDH recommends:

1. Stay at home for at least 10 days, and for 24 hours with no fever and improvement of other symptoms (Your fever should be gone for 24 hours without using fever-reducing medicine).
2. Use the CDC website on how to [Care for yourself at Home](#) with COVID-19.
3. If your household contacts were exposed to you while you had symptoms, they should try to stay home as much as possible for 14 days.

Resources that you may find valuable are, these links are on the Barnum School website also:
